

COLLEGE MATRICULATION, 2003-2010

Because of the small size of each graduating class, CFS offers an eight-year college matriculation span as a measure of the breadth and depth of its students' post-secondary choices. An estimated 95% of each graduating class will pursue a four-year college option; others will explore work, travel and service opportunities, in most cases prior to enrolling at a four-year institution. Recent graduates exploring alternatives to college have pursued activities including music, work with young children, AmeriCorps/VISTA, European travel, and work on organic farms in France and New Zealand (with WWOOF).

The number of students matriculating at each school is noted in parenthesis.
